

The Avdel DK / DL nutserts are available in steel or aluminium. Designed to provide load bearing threads in thin sheet materials.

### Key features and benefits

- Can be used in very thin sheet materials from 0.50mm (.020").
- Wide grip range provides a placing capability in material thickness ranging from 0.5 mm (.020") up to 7.9 mm (.312")
- Splined body provides increased torque-to-turn resistance over conventional non-splined inserts
- Low profile head allows near flush seating without special hole preparation
- Large flange version provides a large bearing surface which increases push-out performance
- Reduced tail end diameter offers ease of hole entry
