

New to Roy Hopwood... Avdel NeoSpeed.

Roy Hopwood and Avdel are pleased to announce the launch of NeoSpeed™ - a new fastener generation of speed fasteners, taking Avdel Speed Fastening® technology to the next level.

Avdel NeoSpeed™ is the first ever developed multi-grip speed fastener. Designed to meet your toughest application requirements, the NeoSpeed can compete against multi-grip breakstem rivets with its superior tensile and shear strength. Less sensitive to the variation of your industry application, Avdel's NeoSpeed™ has been thoughtfully designed to improve assembly quality, with its unique, patent pending hole-filling, external splines fill rear sheet holes and accommodate and can fill misaligned holes.

Avdel NeoSpeed's Features and Benefits

- First ever multi-grip speed industrial fastener
- Superior tensile and shear strength
- Enormous grip range 0.6 to 9.2 mm (.024 to .362"). At the longest - 4.8mm (3/16") the NeoSpeed™ rivet, can be used to replace several standard grip fasteners with just one industrial fastener.
- Due to the multi grip performance, Avdel's NeoSpeed™ range could be reduced to just three grip lengths per diameter.
- In addition NeoSpeed™ industrial fasteners are lighter by around 50% than the equivalent breakstem rivet, and completely eliminate the waste portion of the stem.
- You'll have no need for oversize mandrels either, as just one mandrel fits all recommended hole sizes.

Available Options

- Avdel's NeoSpeed™ is available in 4.8mm (3/16") in steel and aluminium.
- Diameters 4.0 and 3.2mm (5/32" and 1/8")

To find out more about Avdel's Neospeed fastener, talk to one of our team today on 0845 5196066, or email info@rhf.co.uk, to discuss your specific application.
