

**EJOT®**  
**APPLITEC**

The technology behind EJOT products combined with the depth of knowledge shared by the engineering pool, is backed by the competence of EJOT's Application Technology laboratory; APPLITEC.

Be it pre-engineering or re-engineering, the aim is to find the most effective solution in establishing rational fastening and assembly techniques.

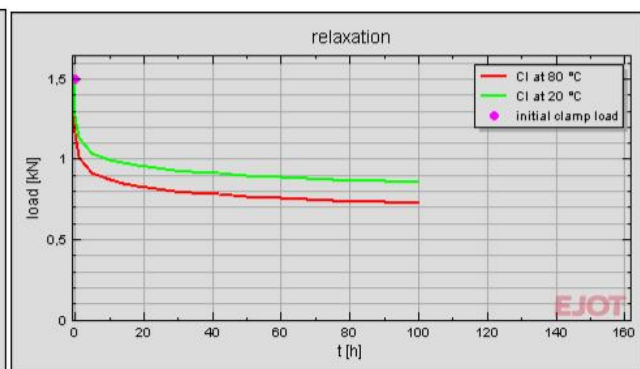

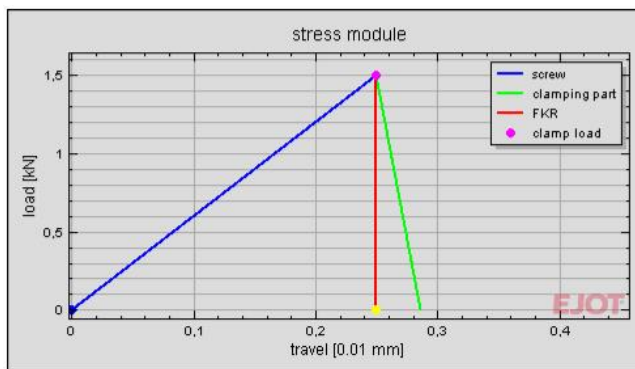

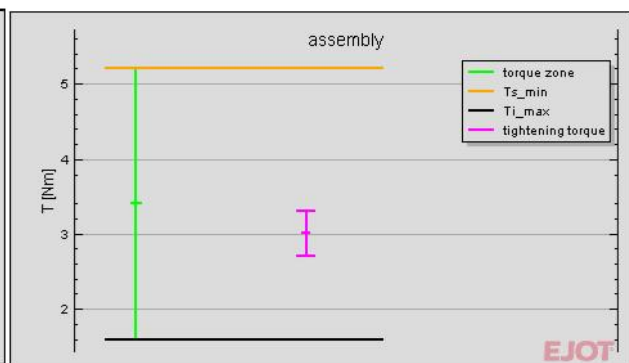

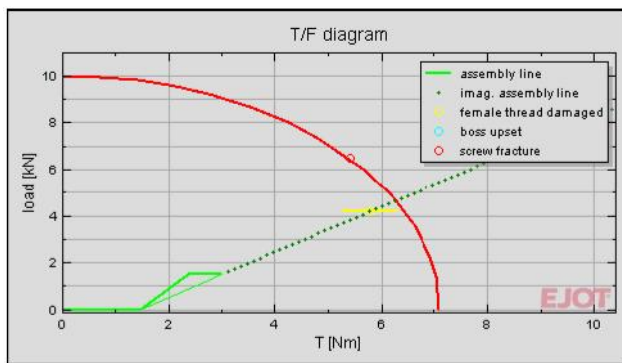

Authorised UK distributors for:

The UK based test laboratory boasts up to date measuring and calibration equipment, providing detailed material analysis along with torque and clamp load data.

The EJOT prognosis program enables dimensioning of screw joints for the future, adding safety during the design stage. A practical test with off-tool components can be done in the EJOT APPLITEC.

Working in partnership with Ejot, Hopwoods welcome the opportunity to become involved in the more demanding aspects of direct screw fixing applications. By utilising this valuable technical resource, we can deliver proven solutions to our customers, and save valuable engineering and development time.
